Description

Job Details

Hiring Organization: Southwest Airlines
Post Name: Cybersecurity Analyst (Intern/Part-Time)
Qualifications: Bachelor's Degree (Completed or In Progress)
Industry: Private
Employment Type: Part-Time
Work Hours: 8 Hours
Salary: \$25/Hour
Location: Dallas, USA

Job Description

Join Southwest Airlines as a **Cybersecurity Analyst Intern** within our Incident Response Team and become part of a frontline defense against cyber threats. This role provides hands-on experience in identifying, analyzing, mitigating, and recovering from cybersecurity incidents.

You will collaborate with experienced professionals to investigate security breaches, develop response strategies, and strengthen system defenses. This opportunity will help you build practical skills in crisis management, threat assessment, and teamwork—preparing you for a dynamic and high-demand career in cybersecurity.

About the Internship

Southwest Airlines is committed to providing employees and interns with equal opportunities for learning and professional growth. Interns in the Technology department are entrusted with meaningful, real-time projects, working collaboratively with cross-functional teams.

You will contribute to company initiatives while supporting Southwest's mission of connecting people to what matters most through friendly, reliable, and low-cost air travel — all while developing yourself as a future professional.

Duties and Responsibilities

- Collaborate with business stakeholders to conduct needs analysis related to systems and processes
- Develop quality technical solutions aligned with business objectives
- Ensure solutions comply with internal standards and departmental guidelines
- Manage timelines for design, development, testing, and implementation
- Support communication between business and technology teams
- Participate in system and user acceptance testing
